The most important part of selling your test or course is the pricing scheme system. There is no limit for the number of pricing schemes that you can create. At BrainCert, you can create a pricing scheme based on Price, Duration, and Access type. For example, you can sell a course for \$40 available for 30 days with a restriction of accessing the course for only 300 times.

Under [Test Management](#) and [Course Management](#) page, you will see "Pricing Schemes" link if the test or course type is "paid" (you will see this option when creating a test or course).

Create a flexible shopping cart based on pricing schemes by clicking on "Add Pricing Scheme" button.
