BrainCert Virtual Classroom provides the essential features needed for seamless synchronous and asynchronous collaboration capabilities between the presenter (teacher) and the attendees (students).

Moderation tools

Instructors can click on the student's name and grant video/audio access, and whiteboard control inside the Virtual Classroom session. Instructors can also kick a user out of the room.

Raise hand

It is not mandatory for students to have a webcam and mic. Students can use the "Raise hand"

feature to get the instructor's attention.
