BrainCert is a cloud-based all-in-one educational platform that comes integrated with 4 core platforms in one unified solution - [courses platform](#), [online testing platform](#), award-winning [virtual classroom](#), and [content management system](#). The result - significant cost savings, increasing productivity, and secure, seamless and enhanced user experience across all platforms.

BrainCert platform comes in 2 different use cases:

## E-Learning Platform

**E-Learning Platform** is tailored for instructors to deliver any type of training and collaborate online. It is a social learning marketplace to create and sell courses, tests and live classes securely.

"[Teacher accounts](#)" allow multiple teachers to teach and collaborate online using the same primary account. Use Virtual Classroom to deliver live classes, webinars, and conferences that engages audience anytime and anywhere!

In short, "E-Learning Platform" does not offer branding. "Enterprise LMS" can be customized with your own logo, theme, and domain. LMS will look like your own product.

## Enterprise LMS

BrainCert's **Enterprise LMS** is a feature-rich learning, and teaching platform to run a versatile online training and collaboration program for your students, employees, or customers with real time tracking of training results. This complete white-label solution allows you to easily rebrand Enterprise LMS with your own logo, domain, users, look & feel, and theme.

Enterprise LMS is role-based, so you can create groups like "Employees", "Customers" etc., and setup courses, tests, and live classes and collaborate securely with granular permissions and access levels. In short, it is a role-based portal that supports granular security. Follow this link to [activate your LMS domain](#) which comes with 15-day free trial.

The BrainCert platform offers a comprehensive set of educational tools that enable users to create and deliver personalized e-learning content online easily!

## E-Learning Platform

## Enterprise LMS
