BrainCert integrates seamlessly with PayPal and Stripe to sell your tests, courses and live classes. No complicated merchant account setup process. Simply enter your verified PayPal Premier or Business email or start accepting payments instantly with Stripe.

Follow these steps to setup your preferred payment gateway to collect payments:

- 1) Login to BrainCert, and go to your [Membership Dashboard](#).
- 2) Click on 'Currency and Payments' tab, and setup either PayPal or Stripe payment gateway. These will be preferred payment methods if you are also planning to use the **E-Learning Platform** and **Virtual Classroom API**. Note that the payment settings can be configured in your **Enterprise LMS** domain under "Account & Settings --> E-commerce".

PayPal - Type your valid PayPal e-mail address to collect payments immediately after every transaction. **You cannot use the same e-mail address configured here to buy your live classes as it is not supported. The e-mail address of the buyer and seller should be different.**

Stripe - Stripe processes all transactions for you. Once your Stripe account is integrated into your site, you can accept payments immediately. To use Stripe, click on the blue button "Connect with Stripe" and follow the setup process.

The green status "connected" means that you are ready to accept payments using *Stripe*. You can revoke this connection anytime by clicking on the red button "Revoke Access".
